Subject: IDP# 0023: CRSW/RR Cooperative, Ashfill Franklin, N.H.

Dear Mr. Presher:

Personnel from the Winnepesaukee River Basin Program (WRBP) have reviewed recent sampling results for your Ashfill facility located at 73 Punch Brook Road in Franklin, N.H. The purpose of the review was to determine compliance with Industrial Discharge permit (IDP) #0023, 40 CFR 403, and applicable requirements thereto. During the review the following deficiencies were noted:

The permit discharge limitations contained in IDP #0023 has a limit for Cadmium of 0.03 mg/L. The results for the sampling conducted by the Cooperative on February 13, 2006 (0.055 mg/L) and the sampling conducted by the WRBP on February 22, 2006 (0.14 mg/L) exceeded that limit. Five sampling events conducted by both the Cooperative and the WRBP during the months of March, April and May all were within permitted parameters; however, the results from sampling conducted by the WRBP on June 6, 2006 (0.062 mg/L) again exceeded the permitted limit.

The WRBP believes that the cited deficiency can be prevented from reoccurring. Within 10 business days of receipt of this letter, please submit a report describing what corrective measures you have taken and what controls you plan to institute to avoid future deficiencies of the same nature. WRBP personnel will continue to conduct regular follow-up reviews to ensure that you are maintaining full compliance with IDP # 0023.
